

GOOD IMPRESSION

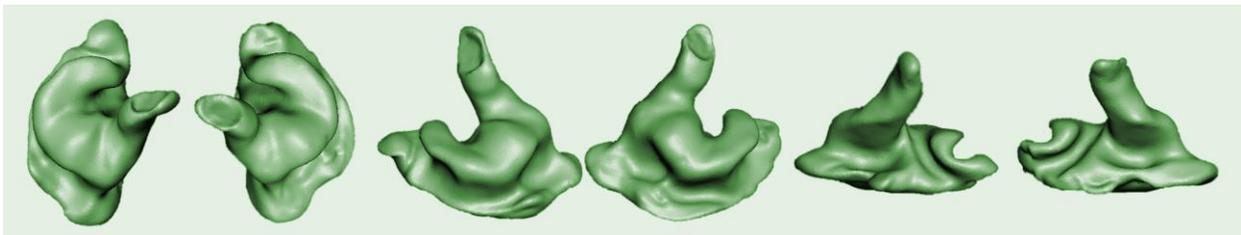

For us to achieve a better form of your Faceplate, we require extra material outside of the ear above the tragus area.

BAD IMPRESSION

- To make sure your ear impressions are usable, take a few photos of your ear impressions in the same angles you see below.

- The photos you provide will be our basis on the quality of your ear impressions. Please send us clear photos of these crucial angles. A good lighting will help us see defects or voids. Please send it to: Orders@flipears.com
- We will send you a confirmation that your ear impressions are approved. By then, you can already ship your ear impressions to our laboratory address:
